

NEW SERVICE AVAILABLE AT AMM ENGINEERING PC!

On January 1, 2024, the NYC DOB began requiring annual inspections of all building parapets fronting the public right-of-way regardless of building height, except 1 or 2 story detached homes and buildings with a fence or other barrier preventing access to the exterior wall, in accordance with NYC Administrative Code Section 28-301.1.1 and RCNY 103-15.

AMM can provide this service! As specified by the applicable code, we can perform close-up inspections of parapets which can be observed from a fire escape or roof and prepare a detailed observation report for submission to the building owner to maintain for 6 years and make available to the DOB upon request, in compliance with the code.

If needed, AMM can also provide recommendations for remedial work to correct deficiencies. Additionally, we can prepare design plans to facilitate such remedial work.

AMM Engineering, PC has been providing diversified engineering and expediting services in the five boroughs and surrounding counties since 1996. Our principal, Mr. Anthony Monaco, is licensed as a Professional Engineer in NY, NJ, CT, and PA.
